

Calcein, Used for the fluorometric determination of calcium and EDTA titration of calcium in the presence of magnesium.

Calcein, Used for the fluorometric determination of calcium and EDTA titration of calcium in the presence of magnesium.

Identificativi Prodotto

Reference: C0875-5G

Descrizione

Dati Tecnici

CAS Number: 154071-48-4

Molecular Formula: C₃H₂₆N₂O₁₃

Purity Grade: Used for the fluorometric determination of calcium and EDTA titration of calcium in the presence of magnesium.

Molecular Weight: 622.53

Shipped on ICE/no ICE: STD

SAP Pack with Pack Qty: 1X5G
Storage Temperature: room temp
