

Glycolaldehyde dimer, crystalline, mixture of stereoisomers. Melts between 80 and 90° C depending on stereoisomeric composition

Glycolaldehyde dimer, crystalline, mixture of stereoisomers. Melts between 80 and 90° C depending on stereoisomeric composition

Identificativi Prodotto

Reference: G6805-1G

Descrizione

Dati Tecnici

CAS Number: 23147-58-2

Molecular Formula: C₄H₈O₄

Purity Grade: crystalline, mixture of stereoisomers. Melts between 80 and 90° C depending on stereoisomeric composition

Molecular Weight: 120.10

Shipped on ICE/no ICE: STD

SAP Pack with Pack Qty: 1X1G

Storage Temperature: 2-8C
